

CULINARY KIDS ACADEMY

We help students learn to **cook** while tapping into and honing their incredible **academic** potential!

Academic School Day Workshops:

Culinary Kids Academy integrates grade level specific, standards based, multi-discipline curricula into complex cooking classes. CKA works closely with School Administrators and classroom teachers to tailor its experiential workshops to address classroom academic goals. Teachers often use these workshops as either a review/test prep tool or ramping up tool for subjects they are imminently covering.

After-School Enrichment Workshops:

Just because school is over, why should the learning stop? Still utilizing our experiential and interactive approach to learning, Culinary Kids Academy works with school administrators, PTA representatives and private on-site enrichment coordinators to provide students with a truly enriching, fun, meaningful, educational and safe after-school experience.

What We've Learned:

CKA has found that because of the fun, story based, experiential nature of our workshops, students become extremely efficient at cognitively processing the academics we cover. Even more exciting, these same students demonstrate the ability to retain these lessons for a longer period of time due to the manner in which they've been taught. They're learning while having a blast! It's the ultimate win-win proposition!

"Lincoln Elementary School values student wellness and health along with academics and Culinary Kids Academy has been a great fit for our school. It meets the needs of our wide variety of age groups and learner types while blending math, science and social studies into its culinary lessons. Our students and staff love it!"

Jeff Winckler, Principal, Lincoln Elementary School, Redondo Beach Unified School District
